DRY		
WET		

BORING NO.: RC-20-003 (B-13)	DEPTH: 126.5' - 135.0'	BOX NO.: 13 / 16
---------------------------------	---------------------------	---------------------

DRY

WET

BORING NO.: RC-20-003 (B-13)	DEPTH: 135.0' - 143.8'	BOX NO.: 14 / 16
DRY	 A photograph showing a white cardboard box containing several long, cylindrical rock core samples. The samples are arranged in a row, with some showing fractures. A color calibration strip is visible at the top, and a ruler is placed below the box for scale. The samples are labeled with numbers 140 and 141 on small wooden tags.	
WET	 A photograph showing the same rock core samples as in the 'DRY' section, but now they appear dark and wet. The same color calibration strip and ruler are present for comparison.	

BORING NO.: RC-20-003 (B-13)	DEPTH: 143.8' - 152.0'	BOX NO.: 15 / 16
---------------------------------	---------------------------	---------------------

DRY

WET

BORING NO.: RC-20-003 (B-13)	DEPTH: 152.0' - 155.0'	BOX NO.: 16 / 16
---------------------------------	---------------------------	---------------------

DRY

WET

BORING NO.: RC-20-004 (B-11)	DEPTH: 2.0' - 18.3'	BOX NO.: 1 / 19
---------------------------------	------------------------	--------------------

DRY

WET

BORING NO.: RC-20-004 (B-11)	DEPTH: 18.3' - 28.3'	BOX NO.: 2 / 19
DRY	 A photograph showing four rock core samples arranged vertically in a white box. The top sample is labeled '18.3 ft' and the second sample is labeled '23.3 ft'. Above the box is a color calibration strip with various colored squares. Below the box is a ruler with markings from 13 to 36 inches. The rock samples are dark, fragmented, and appear dry.	
WET	 A photograph showing the same four rock core samples as in the 'DRY' section, arranged vertically in a white box. The top sample is labeled '18.3 ft' and the second sample is labeled '23.3 ft'. Above the box is a color calibration strip with various colored squares. Below the box is a ruler with markings from 13 to 36 inches. The rock samples are dark, fragmented, and appear wet, with some visible moisture on their surfaces.	

BORING NO.: RC-20-004 (B-11)	DEPTH: 28.3' - 38.3'	BOX NO.: 3 / 19
---------------------------------	-------------------------	--------------------

DRY

WET

BORING NO.: RC-20-004 (B-11)	DEPTH: 38.3' - 48.3'	BOX NO.: 4 / 19
---------------------------------	-------------------------	--------------------

DRY

WET

BORING NO.: RC-20-004 (B-11)	DEPTH: 48.3' - 55.8'	BOX NO.: 5 / 19
DRY	 A photograph showing four rock core samples arranged horizontally in a white box. The samples are dark, fractured, and appear dry. A color calibration strip is visible above the box, and a ruler is placed below it. The samples are labeled with depth markers: '48.3'' on the left and '53.3'' on the right.	
WET	 A photograph showing the same four rock core samples as in the 'DRY' section, but now they appear wet and more reflective. The color calibration strip and ruler are still present, and the depth labels '48.3'' and '53.3'' are visible.	

BORING NO.: RC-20-004 (B-11)	DEPTH: 55.8' - 65.8'	BOX NO.: 6 / 19
---------------------------------	-------------------------	--------------------

DRY

DRY

WET

BORING NO.: RC-20-004 (B-11)	DEPTH: 163.3' - 173.3'	BOX NO.: 17 / 19
DRY	 A photograph showing five rock core samples arranged horizontally in a white tray. The samples are dark, possibly black or very dark grey, and appear to be fractured. Above the tray is a color calibration strip with various colored squares. Below the tray is a ruler with markings in inches and centimeters. A small label on the left side of the tray indicates '163.3 ft' and another label on the right side indicates '168.5 ft'.	
WET	 A photograph showing five rock core samples arranged horizontally in a white tray, similar to the one above. The samples are dark and appear to be fractured. Above the tray is a color calibration strip. Below the tray is a ruler. A small label on the left side of the tray indicates '163.3 ft' and another label on the right side indicates '168.5 ft'.	

BORING NO.: RC-20-004 (B-11)	DEPTH: 173.3' - 181.2'	BOX NO.: 18 / 19

BORING NO.: RC-20-011 (B-32)	DEPTH: 28.1' - 38.6'	BOX NO.: 2 / 32
DRY	 A photograph showing five horizontal trays of rock core samples. The trays are labeled with depth markers: 28.1', 31.1', and 33.6'. The samples are brownish, fragmented rock material. Above the trays is a color calibration strip with various colored squares. Below the trays is a ruler with markings from 15 to 36 inches.	
WET	 A photograph showing five horizontal trays of rock core samples, identical to the one above. The trays are labeled with depth markers: 28.1', 31.1', and 33.6'. The samples are brownish, fragmented rock material. Above the trays is a color calibration strip with various colored squares. Below the trays is a ruler with markings from 15 to 36 inches.

BORING NO.: RC-20-011 (B-32)	DEPTH: 96.1' - 103.6'	BOX NO.: 9 / 32
DRY	 A photograph showing four rock core samples arranged horizontally in a white tray. The samples are labeled with depth markers: 96.1, 98.6, and 103.6. Above the tray is a color calibration strip with various colored squares. Below the tray is a ruler with markings in inches and centimeters. The rock samples are dark gray to black, with some lighter gray areas and visible fractures.	
WET	 A photograph showing the same four rock core samples as in the 'DRY' section, but now wet. The samples are labeled with depth markers: 96.1, 98.6, and 103.6. Above the tray is a color calibration strip with various colored squares. Below the tray is a ruler with markings in inches and centimeters. The wet samples show more detail in their texture and color, with some areas appearing darker and more reflective.	

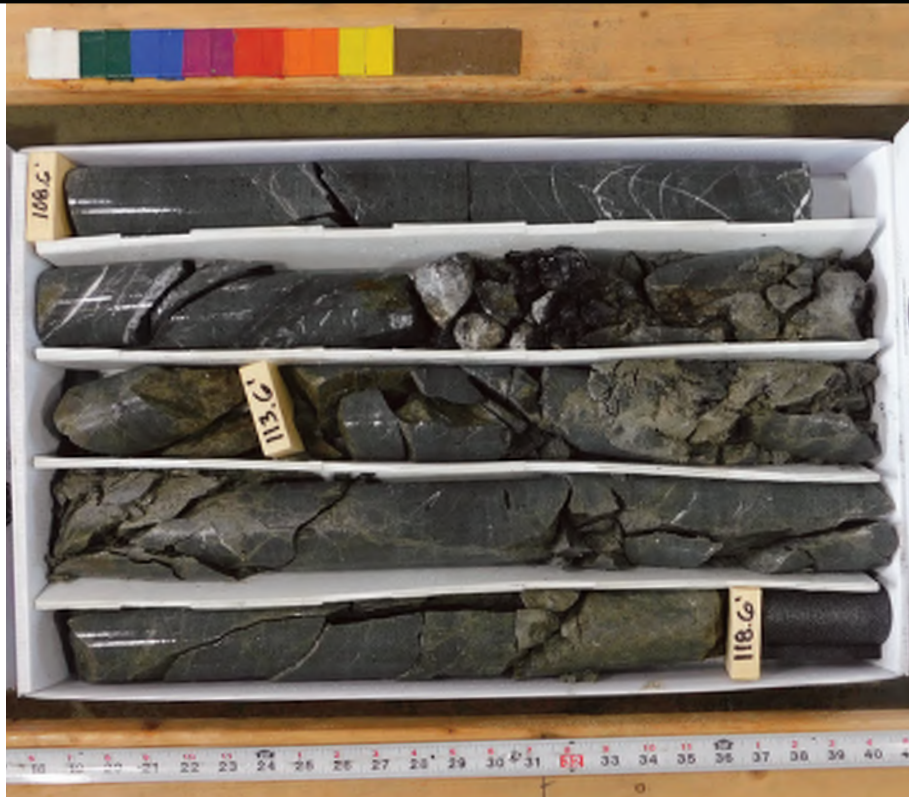

BORING NO.: RC-20-011 (B-32)	DEPTH: 103.6' - 108.6'	BOX NO.: 10 / 32
DRY	 A photograph showing three rock core samples arranged horizontally in a white tray. The samples are light gray and appear dry. The top sample is labeled '103.6' on its left end, and the bottom sample is labeled '108.6' on its right end. A color calibration strip with various colored squares is positioned above the tray. A ruler is visible below the tray, showing measurements in inches and centimeters. The tray is supported by wooden blocks.	
WET	 A photograph showing the same three rock core samples as in the 'DRY' section, but they are now dark gray and appear wet. The labels '103.6' and '108.6' are still visible. The color calibration strip and ruler are also present, providing a consistent scale and color reference.

BORING NO.: RC-20-011 (B-32)	DEPTH: 278.3' - 285.9'	BOX NO.: 30 / 32
DRY	 A photograph showing four rock core samples arranged horizontally in a white tray. The samples are dark, cylindrical, and show some internal fractures. Above the tray is a color calibration strip with various colored squares. Below the tray is a ruler marked in inches, showing measurements from 17 to 39. The tray has labels on the left and right sides: '278.3' on the left, and '283.5' and '285.9' on the right.	
WET	 A photograph showing four rock core samples arranged horizontally in a white tray, similar to the one above. The samples are dark, cylindrical, and show some internal fractures. Above the tray is a color calibration strip with various colored squares. Below the tray is a ruler marked in inches, showing measurements from 17 to 39. The tray has labels on the left and right sides: '278.3' on the left, and '283.5' and '285.9' on the right.	

BORING NO.: RC-20-011 (B-32)	DEPTH: 285.9' - 293.6'	BOX NO.: 31 / 32
DRY	 A photograph showing three rock core samples in a white tray. The samples are labeled with depth markers: 285.9, 288.6, and 293.6. A color calibration strip is visible at the top, and a ruler is at the bottom.	
WET	 A photograph showing the same three rock core samples as above, but wet. The samples are labeled with depth markers: 285.9, 288.6, and 293.6. A color calibration strip is visible at the top, and a ruler is at the bottom.

DRY	 A photograph showing four horizontal sections of rock core samples arranged in a white tray. The sections are labeled with depth markers: '90.3' on the left, '93.6' in the center, and '98.6' on the right. Above the tray is a color calibration strip with various colored squares. Below the tray is a ruler showing measurements in inches and centimeters. The rock samples are dark gray and appear to be fractured.	
WET	 A photograph showing four horizontal sections of rock core samples arranged in a white tray, identical to the one above. The sections are labeled with depth markers: '90.3' on the left, '93.6' in the center, and '98.6' on the right. Above the tray is a color calibration strip with various colored squares. Below the tray is a ruler showing measurements in inches and centimeters. The rock samples are dark gray and appear to be fractured.

DRY	 A photograph showing five horizontal compartments of a white tray filled with rock core samples. The samples are light gray and appear dry. A color calibration strip with various colored squares is positioned above the tray. A ruler with markings in inches and centimeters is placed below the tray. Two white labels with handwritten text are visible: '114.5' on the left and '119.5' in the middle compartment.	
WET	 A photograph of the same rock core samples as in the 'DRY' section, but now they are wet. The samples are dark gray and show some surface sheen. The color calibration strip and ruler are still present in the same positions. The labels '114.5' and '119.5' are also visible.
