BORING NO.: RC-20-014 (B-29)	DEPTH: 163.7' - 171.3'	BOX NO.: 15 / 29
DRY	 A photograph of a white tray containing four sections of rock core samples. The top section is labeled '163.7' and the bottom section is labeled '164.2'. A color calibration strip is visible above the tray, and a ruler is visible below it. The rock samples are light gray and appear dry.	
WET	 A photograph of a white tray containing four sections of rock core samples, similar to the one above. The top section is labeled '163.7' and the bottom section is labeled '164.2'. A color calibration strip is visible above the tray, and a ruler is visible below it. The rock samples are dark gray and appear wet.	

BORING NO.: RC-20-014 (B-29)	DEPTH: 171.3' - 180.9'	BOX NO.: 16 / 29
DRY	 A photograph of a white tray containing five compartments of rock core samples. The samples are dark gray to black, fragmented, and appear dry. Above the tray is a color calibration strip with 11 color patches. Below the tray is a ruler with markings from 17 to 40 inches. White labels with black text are placed in the compartments: '171.3' in the top left, '173.7' in the second compartment from the top, and '178.7' in the fourth compartment from the top.	
WET	 A photograph of a white tray containing five compartments of rock core samples, similar to the one above but labeled 'WET'. The samples are dark gray to black, fragmented, and appear wet. Above the tray is a color calibration strip with 11 color patches. Below the tray is a ruler with markings from 17 to 40 inches. White labels with black text are placed in the compartments: '171.3' in the top left, '173.7' in the second compartment from the top, and '178.7' in the fourth compartment from the top.

BORING NO.: RC-20-014 (B-29)	DEPTH: 210.3' - 218.9'	BOX NO.: 20 / 29
DRY	 A photograph of a white storage box containing several horizontal sections of dark grey rock core. The sections are arranged in a stack. A color calibration strip with various colored squares is placed above the box. A ruler is visible at the bottom of the box. Handwritten labels on the box indicate depths: 210.3' on the left, 214.6' and 216.4' in the center, and 218.9' on the right. The rock core appears dry and somewhat fractured.	
WET	 A photograph of the same white storage box containing the same horizontal sections of dark grey rock core, but now they appear wet and more reflective. The color calibration strip and ruler are still present. The handwritten labels for depths (210.3', 214.6', 216.4', 218.9') are visible on the box.	

BORING NO.: RC-20-014 (B-29)	DEPTH: 218.9' - 228.7'	BOX NO.: 21 / 29
DRY		
WET		

BORING NO.: RC-20-014 (B-29)	DEPTH: 228.7' - 238.7'	BOX NO.: 22 / 29
DRY	 A photograph showing five horizontal sections of rock core samples arranged in a white tray. The rock is dark gray and appears fractured. A white label with the handwritten number '233.7' is placed in the center of the tray. Above the tray is a color calibration strip with various colored squares. Below the tray is a white ruler with black markings, showing inches from 17 to 40. The tray is resting on a wooden surface.	
WET	 A photograph showing five horizontal sections of rock core samples arranged in a white tray, similar to the one above. The rock appears darker and more saturated, likely due to being wet. A white label with the handwritten number '233.7' is placed in the center of the tray. Above the tray is a color calibration strip with various colored squares. Below the tray is a white ruler with black markings, showing inches from 17 to 40. The tray is resting on a wooden surface.	

BORING NO.: RC-20-014 (B-29)	DEPTH: 238.7' - 248'	BOX NO.: 23 / 29
DRY	 A photograph showing five horizontal sections of rock core samples arranged in a white tray. The top section is labeled '238.7' and the middle section is labeled '243.7'. Above the tray is a color calibration strip with various colored squares. Below the tray is a ruler with markings in inches and centimeters. The rock samples are dark gray and appear to be fractured.	
WET	 A photograph showing five horizontal sections of rock core samples arranged in a white tray, similar to the one above. The top section is labeled '238.7' and the middle section is labeled '243.7'. Above the tray is a color calibration strip with various colored squares. Below the tray is a ruler with markings in inches and centimeters. The rock samples are dark gray and appear to be fractured.
